

用 SYBASE-ARC 工具管理 WGT 数据

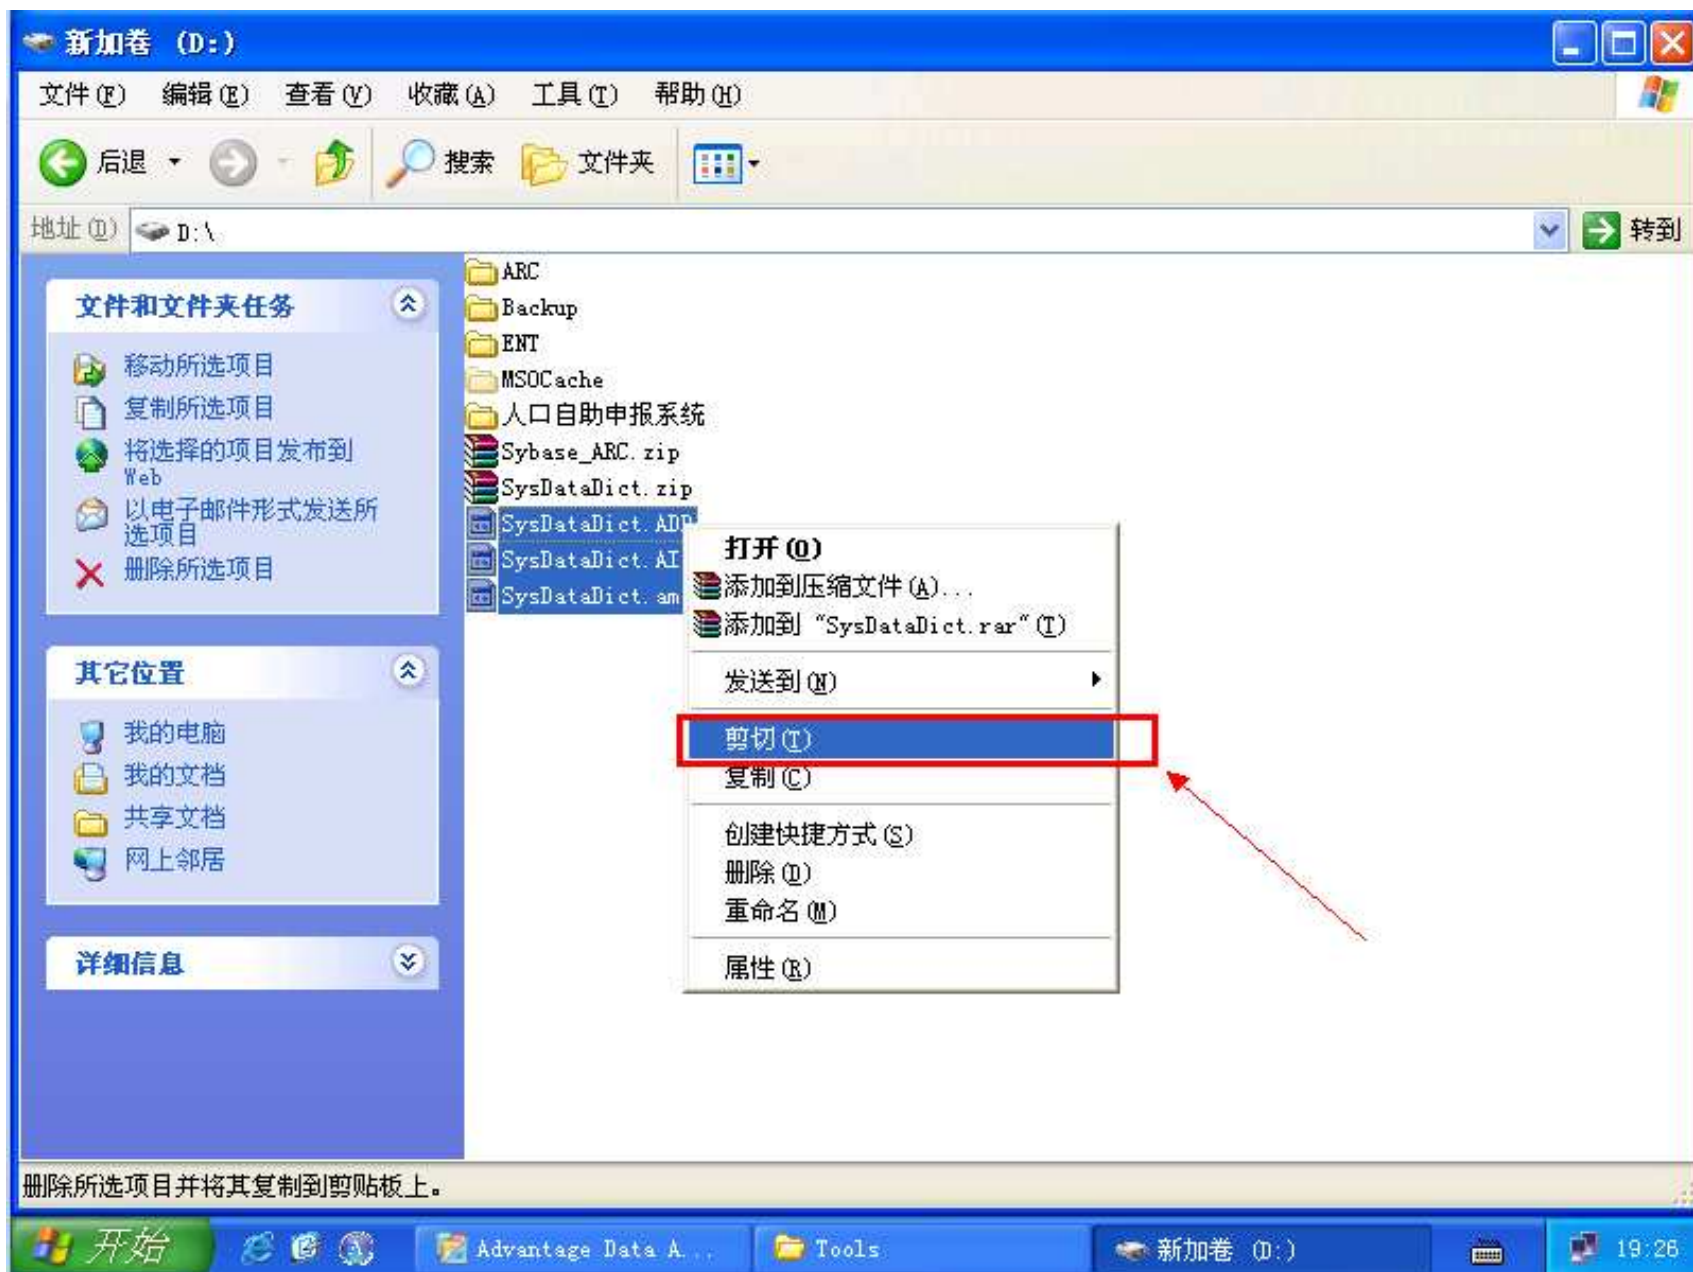

1) 解压 "Sybase_ARC.zip", ARC 为 Sybase 提供的绿色免费工具, 无需注册;

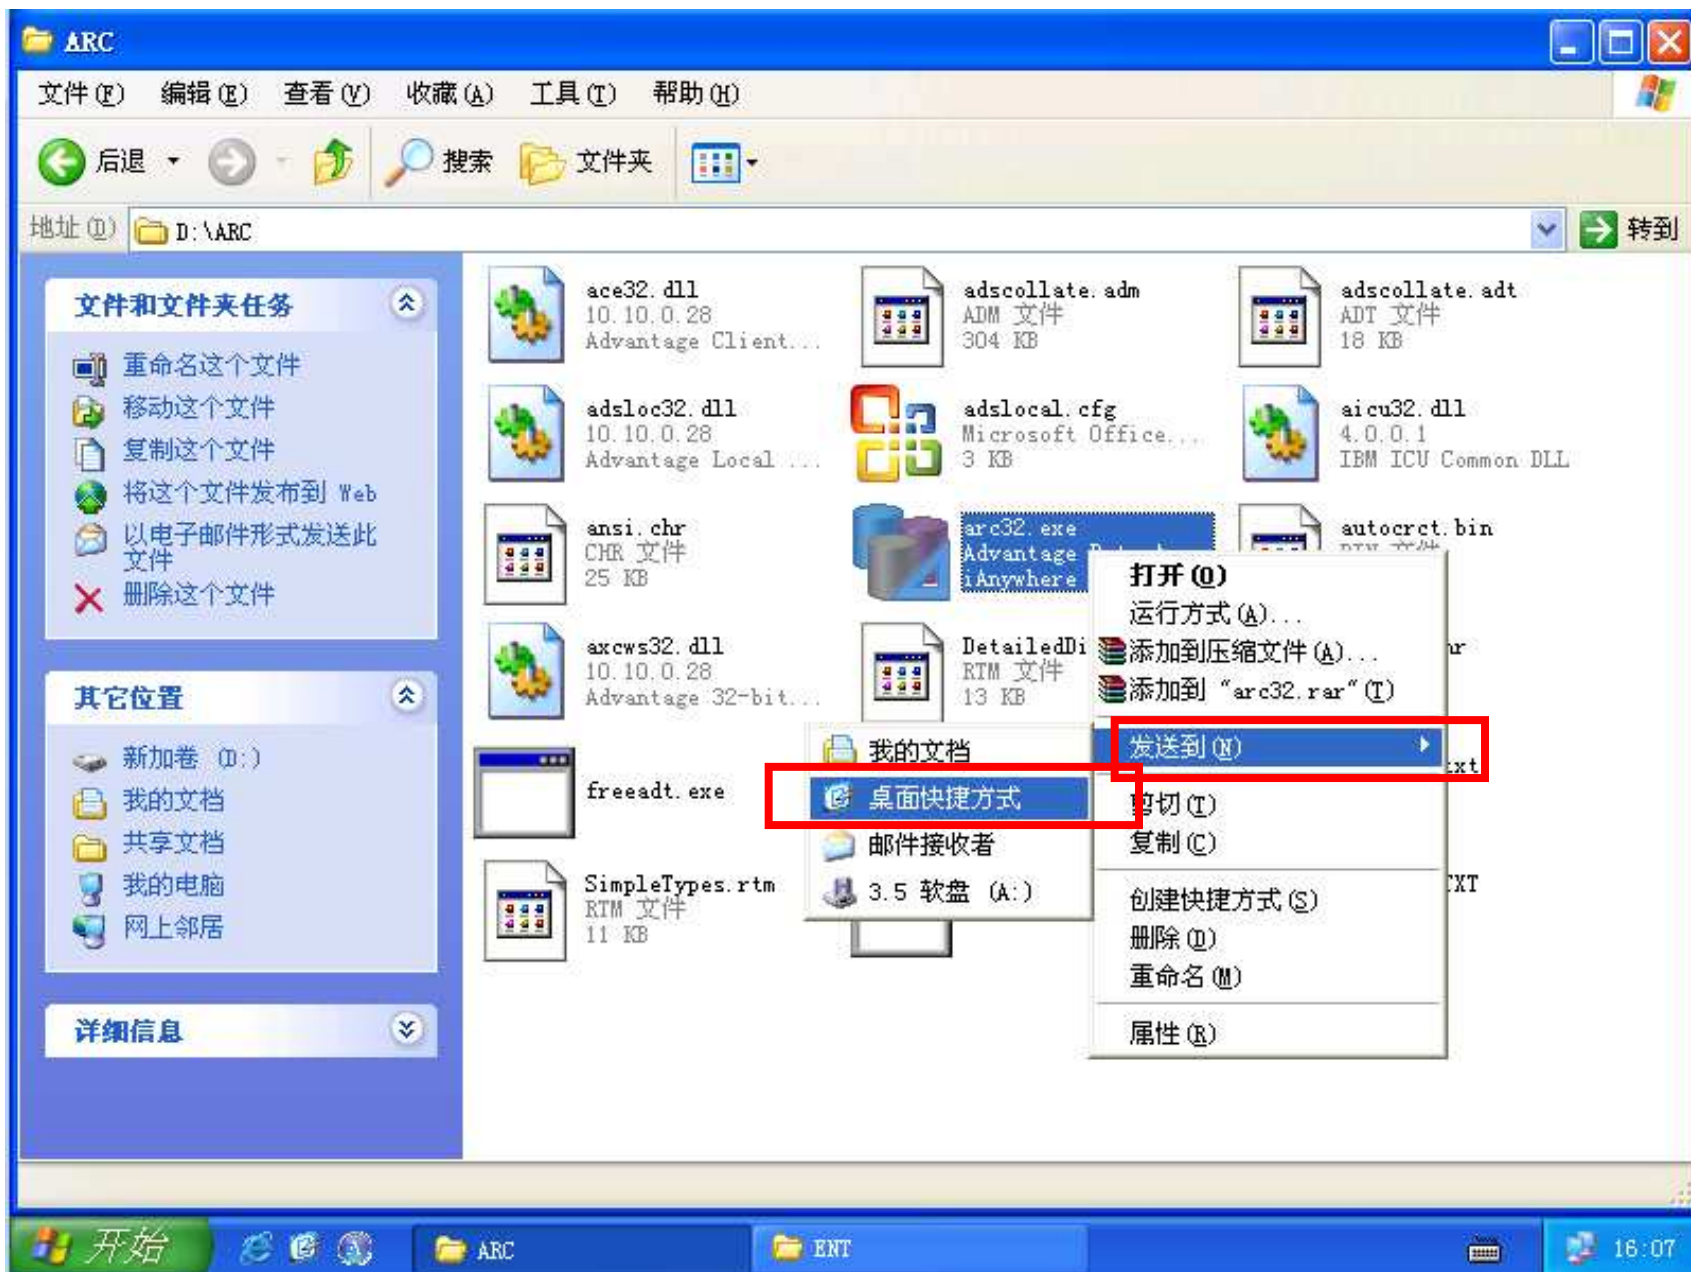

2) 解压 ACR 数据库管理文件，其中包括有“SYSDATADICT.ADD”，“SYSDATADICT.AI”和“SYSDATADICT.AM”三个数据库文件；

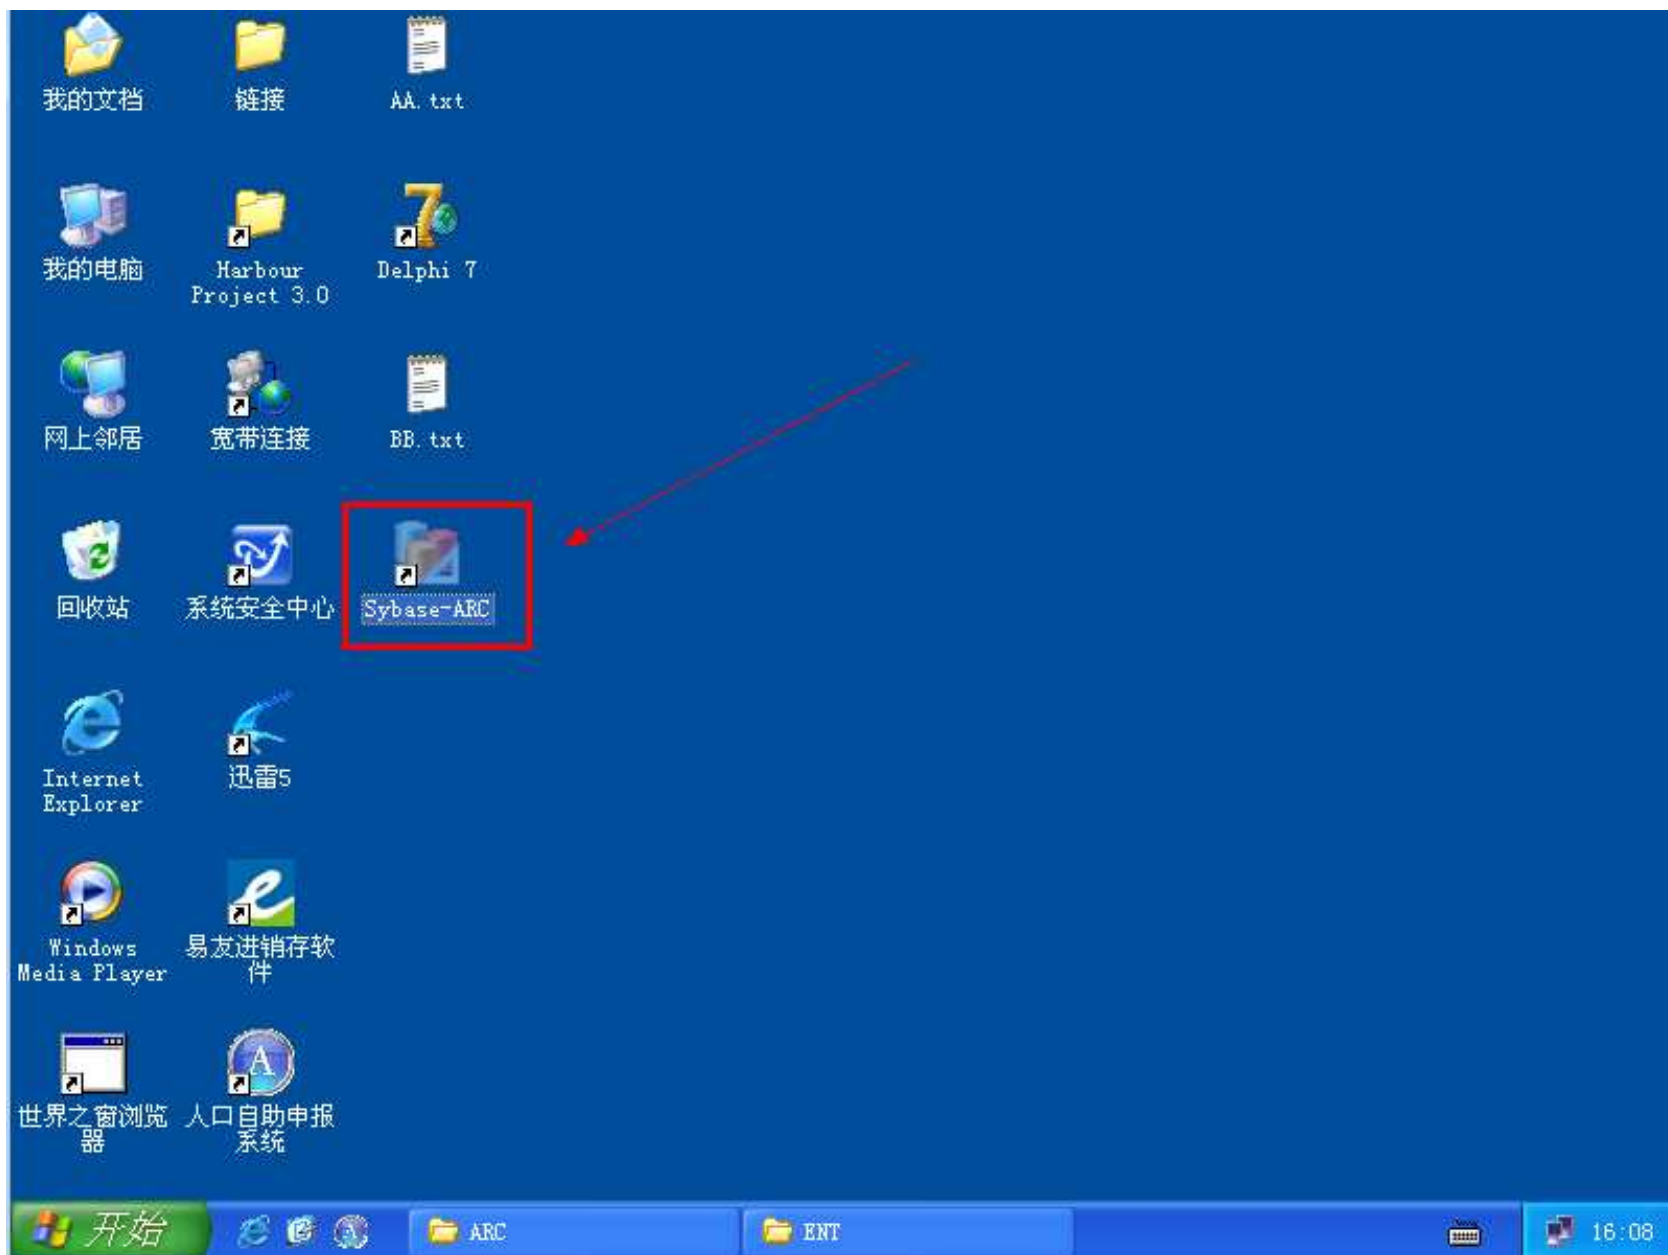

3) 将解压后的三个数据库文件剪切到服务器端“Server\Data”文件夹下；

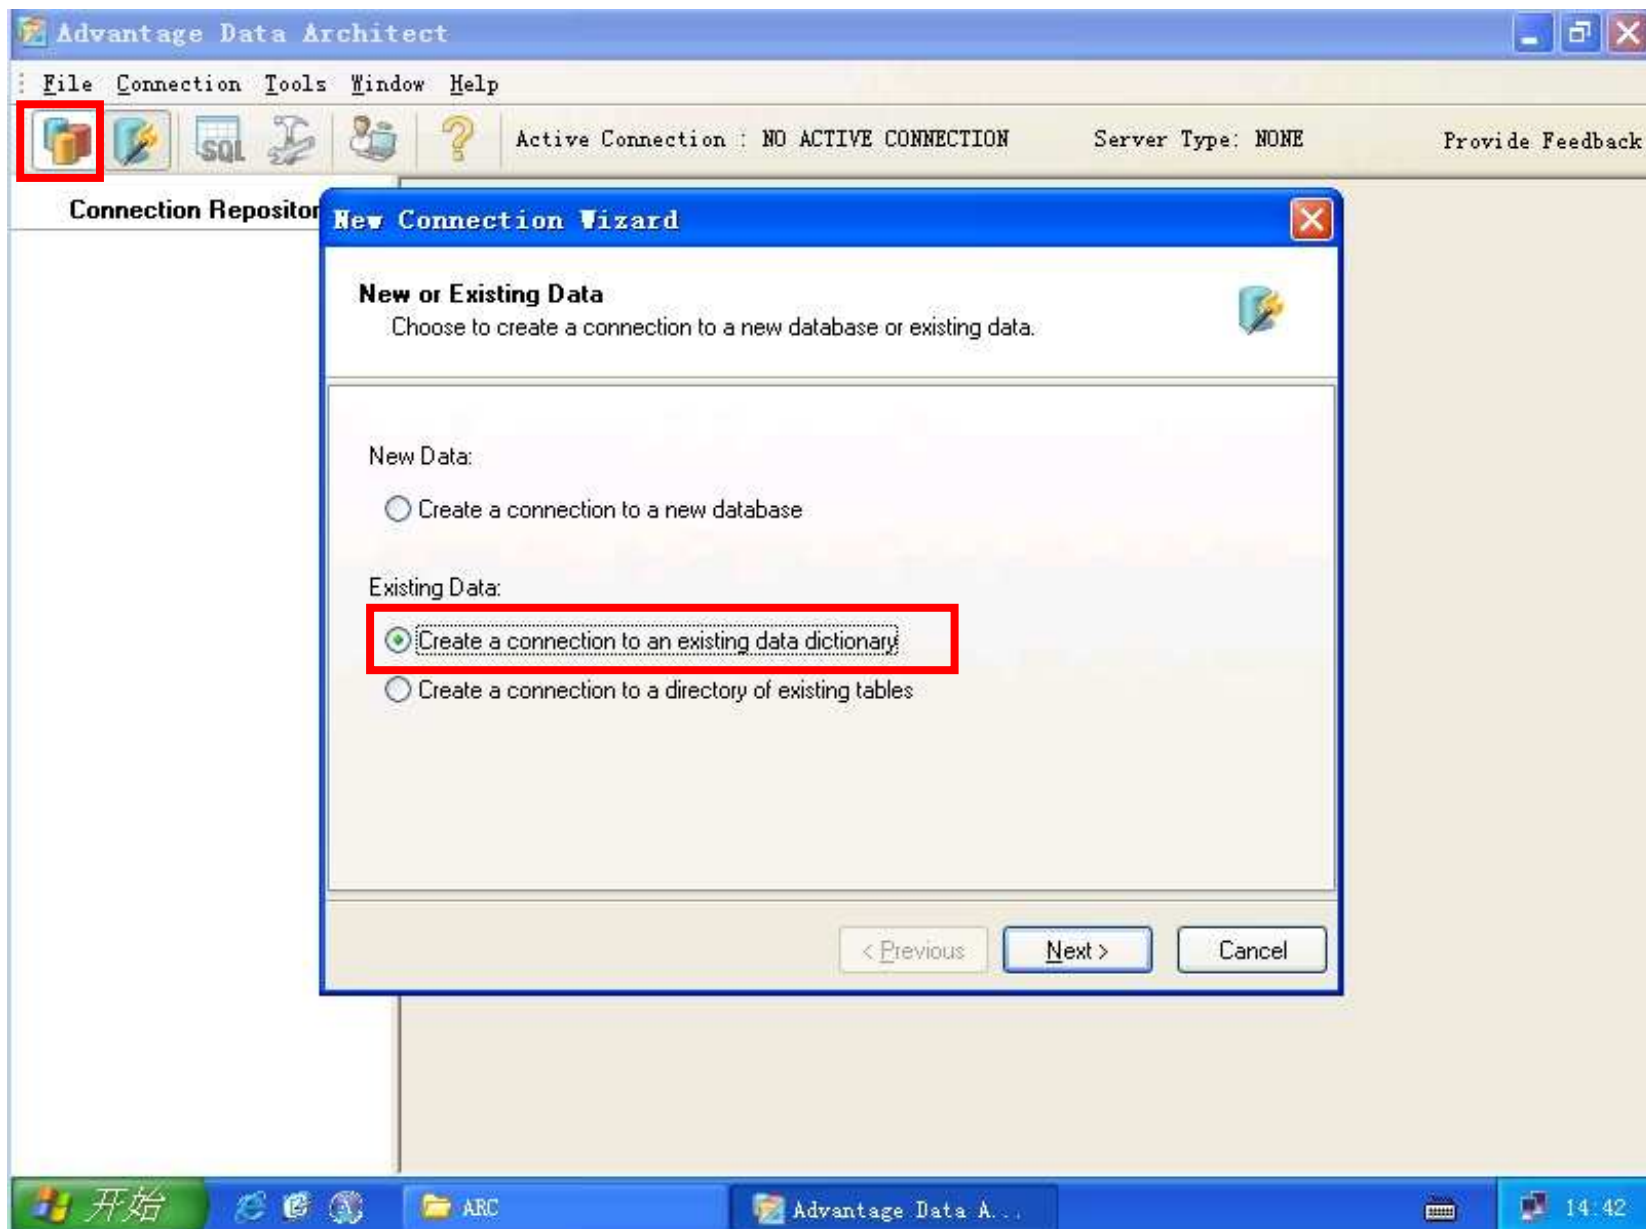

4) 打开 ARC 工具主文件夹, 将 “arc32.exe” 发送到当前桌面, 并改名为” SYBASE-ARC”；

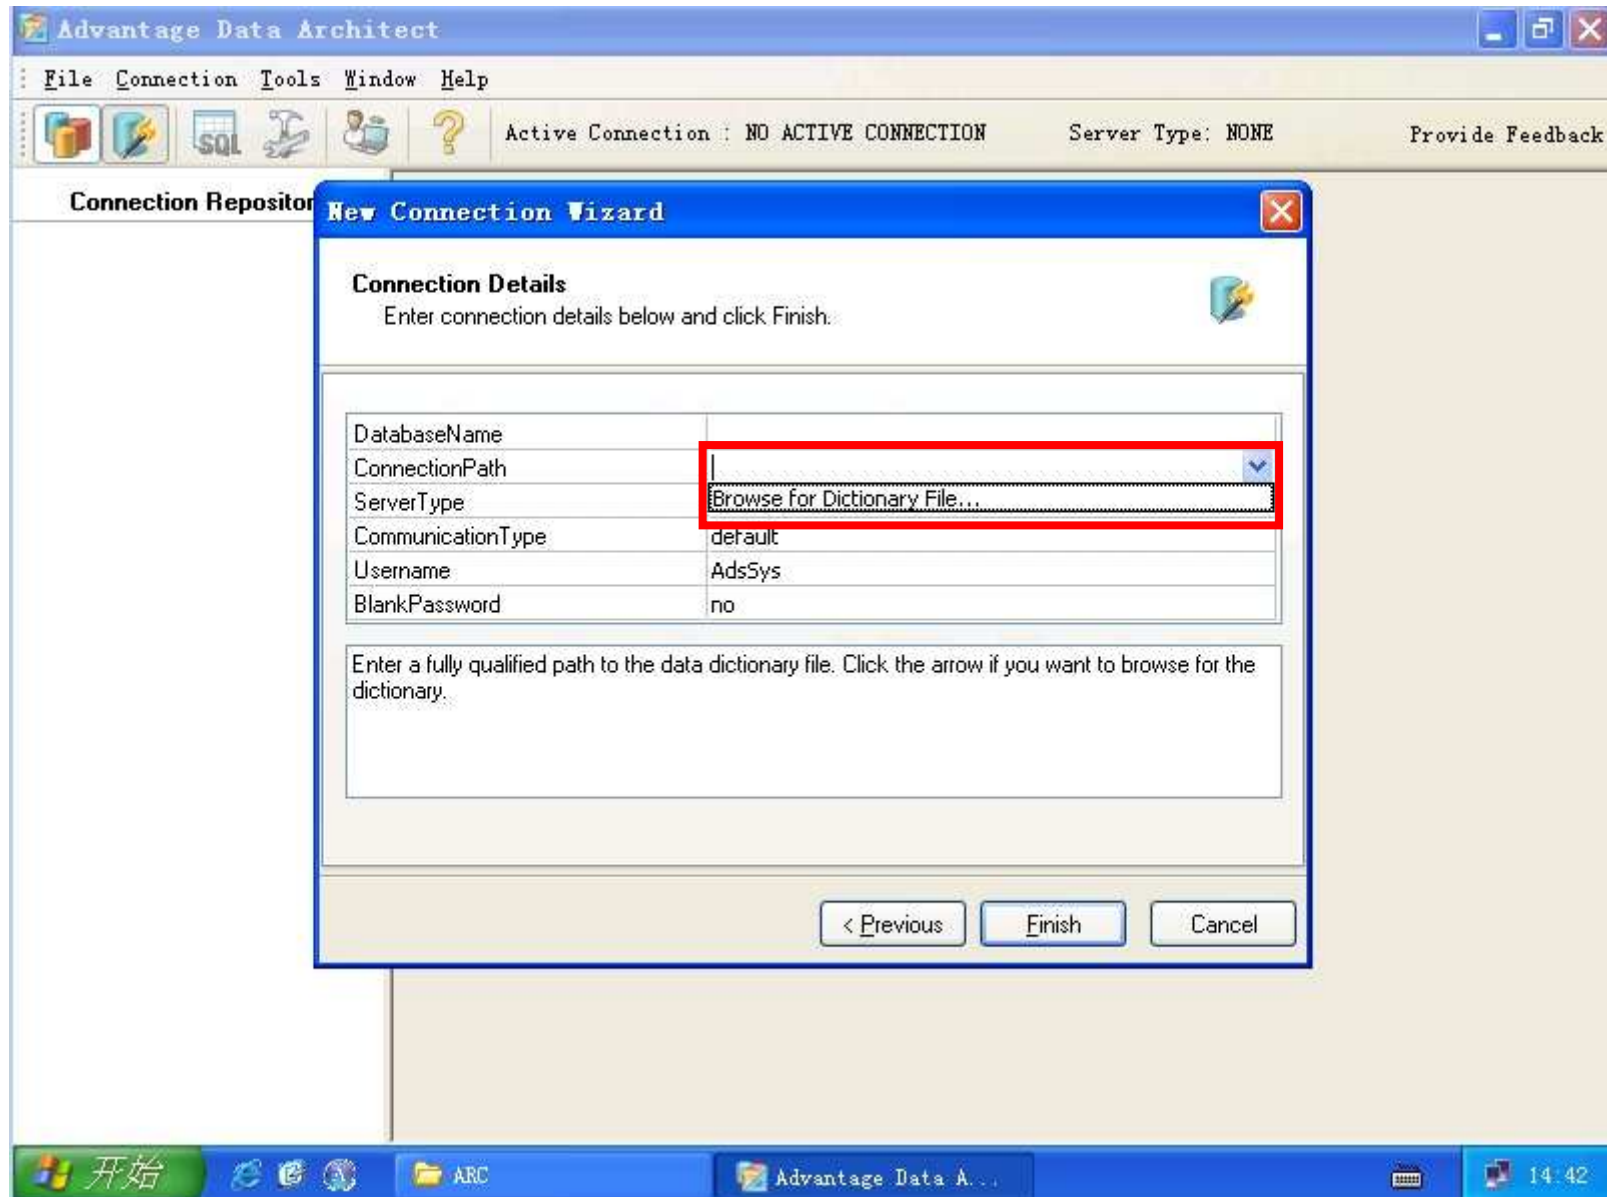

5) 打开桌面上的”SYBASE-ARC”图标；

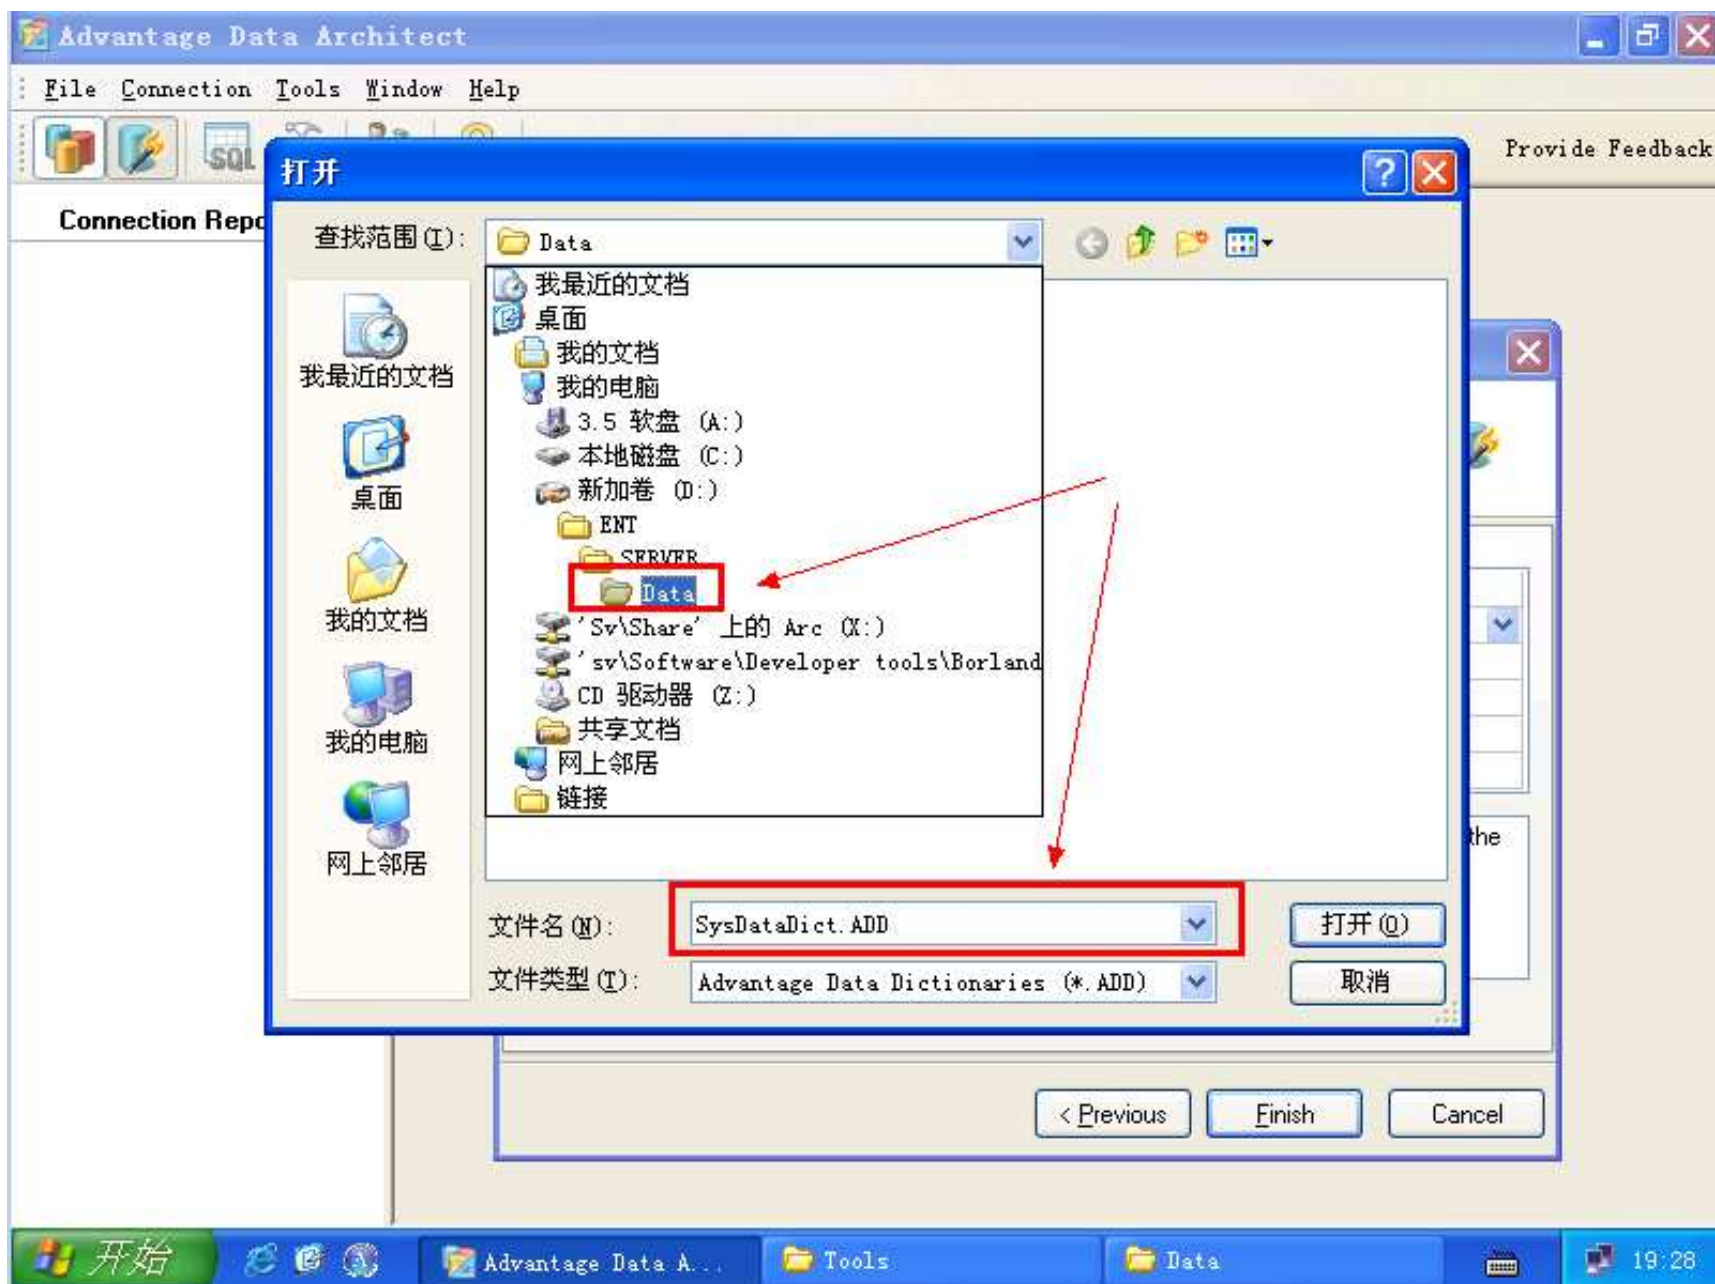

6) 选择”File->New Connection Wizard”菜单，再选择“Create a connection to an existing data dictionary”

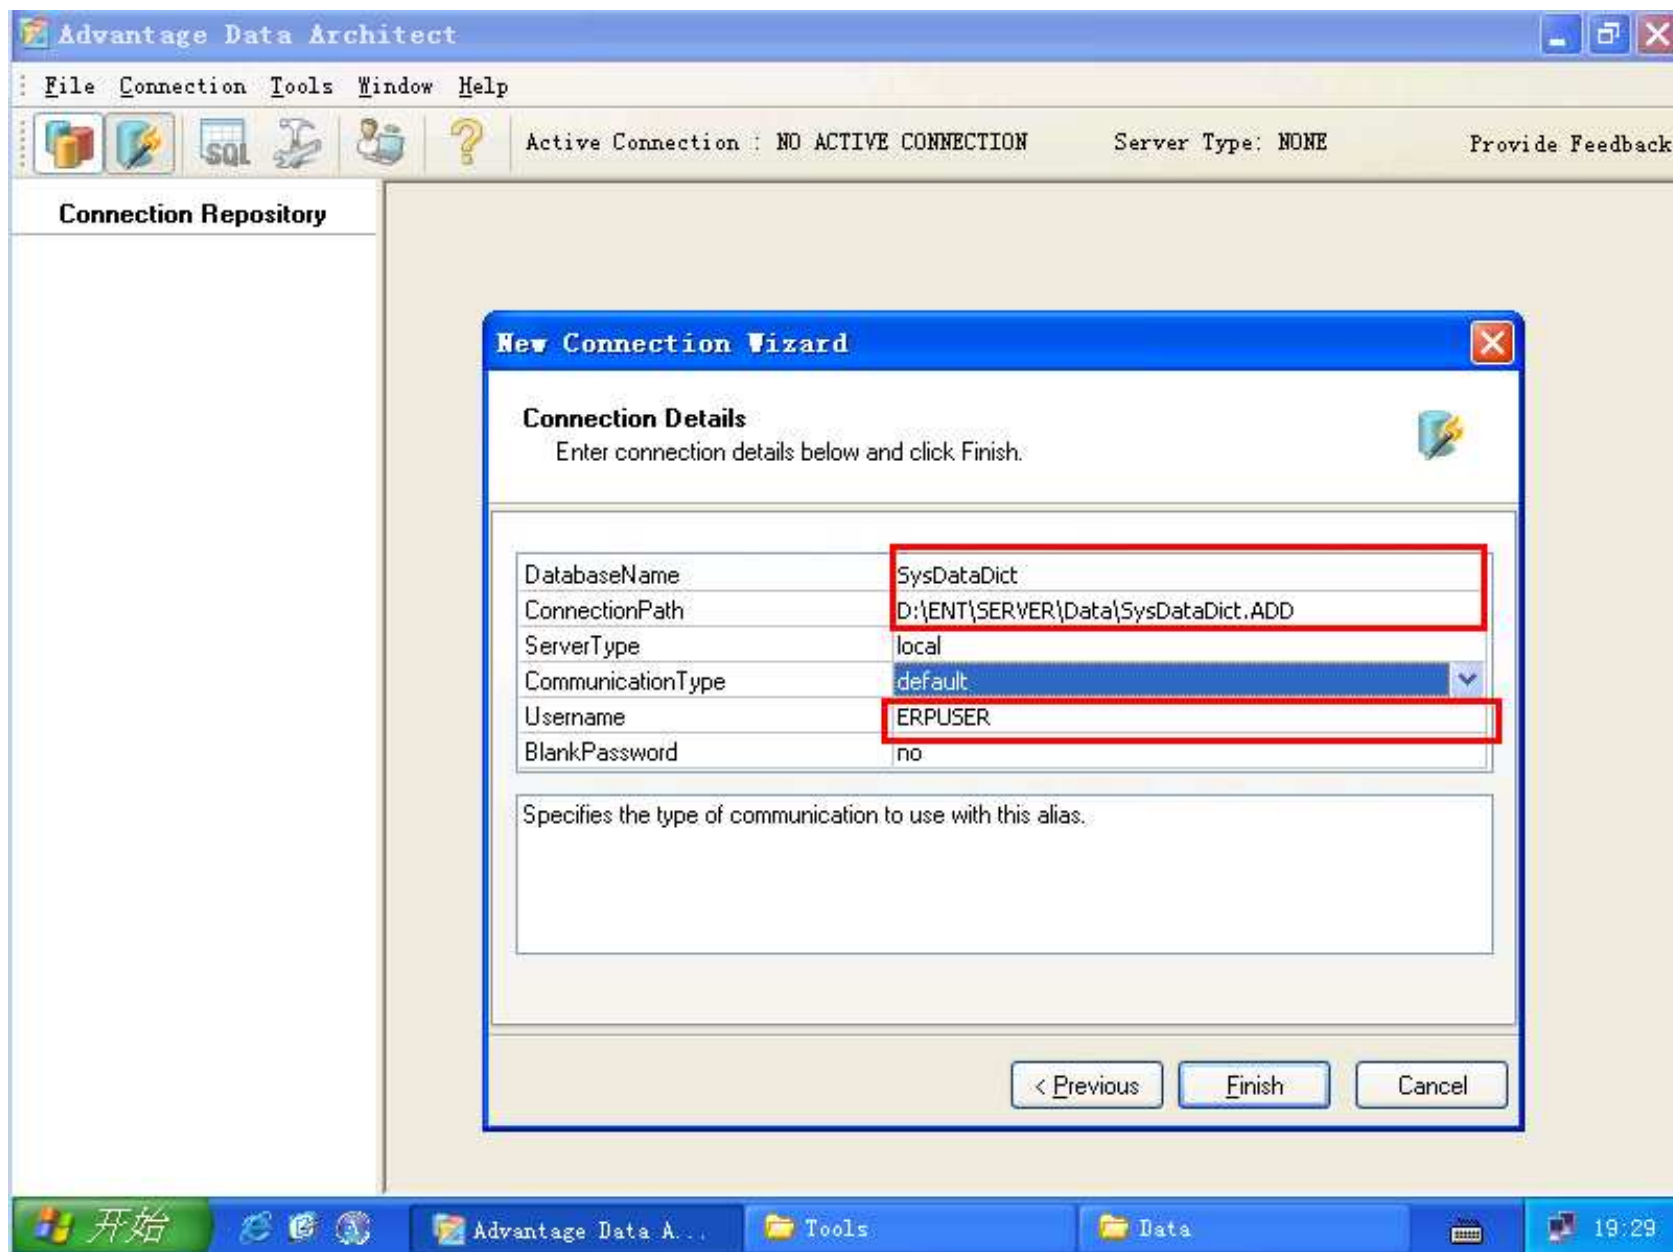

7) 选择” Connection Path” 内容;

8) 选择正确“SYSDATADICT.ADD”文件所在路径；

9) 选择正确的参数, 然后再按“Finish”按钮, 数据库用户为“erpuser”, 密码“erptest”;

10) ARC 支持 SQL 语句查询;

The screenshot shows the Advantage Data Architect SQL Utility interface. The main window displays a SQL query in a text editor:

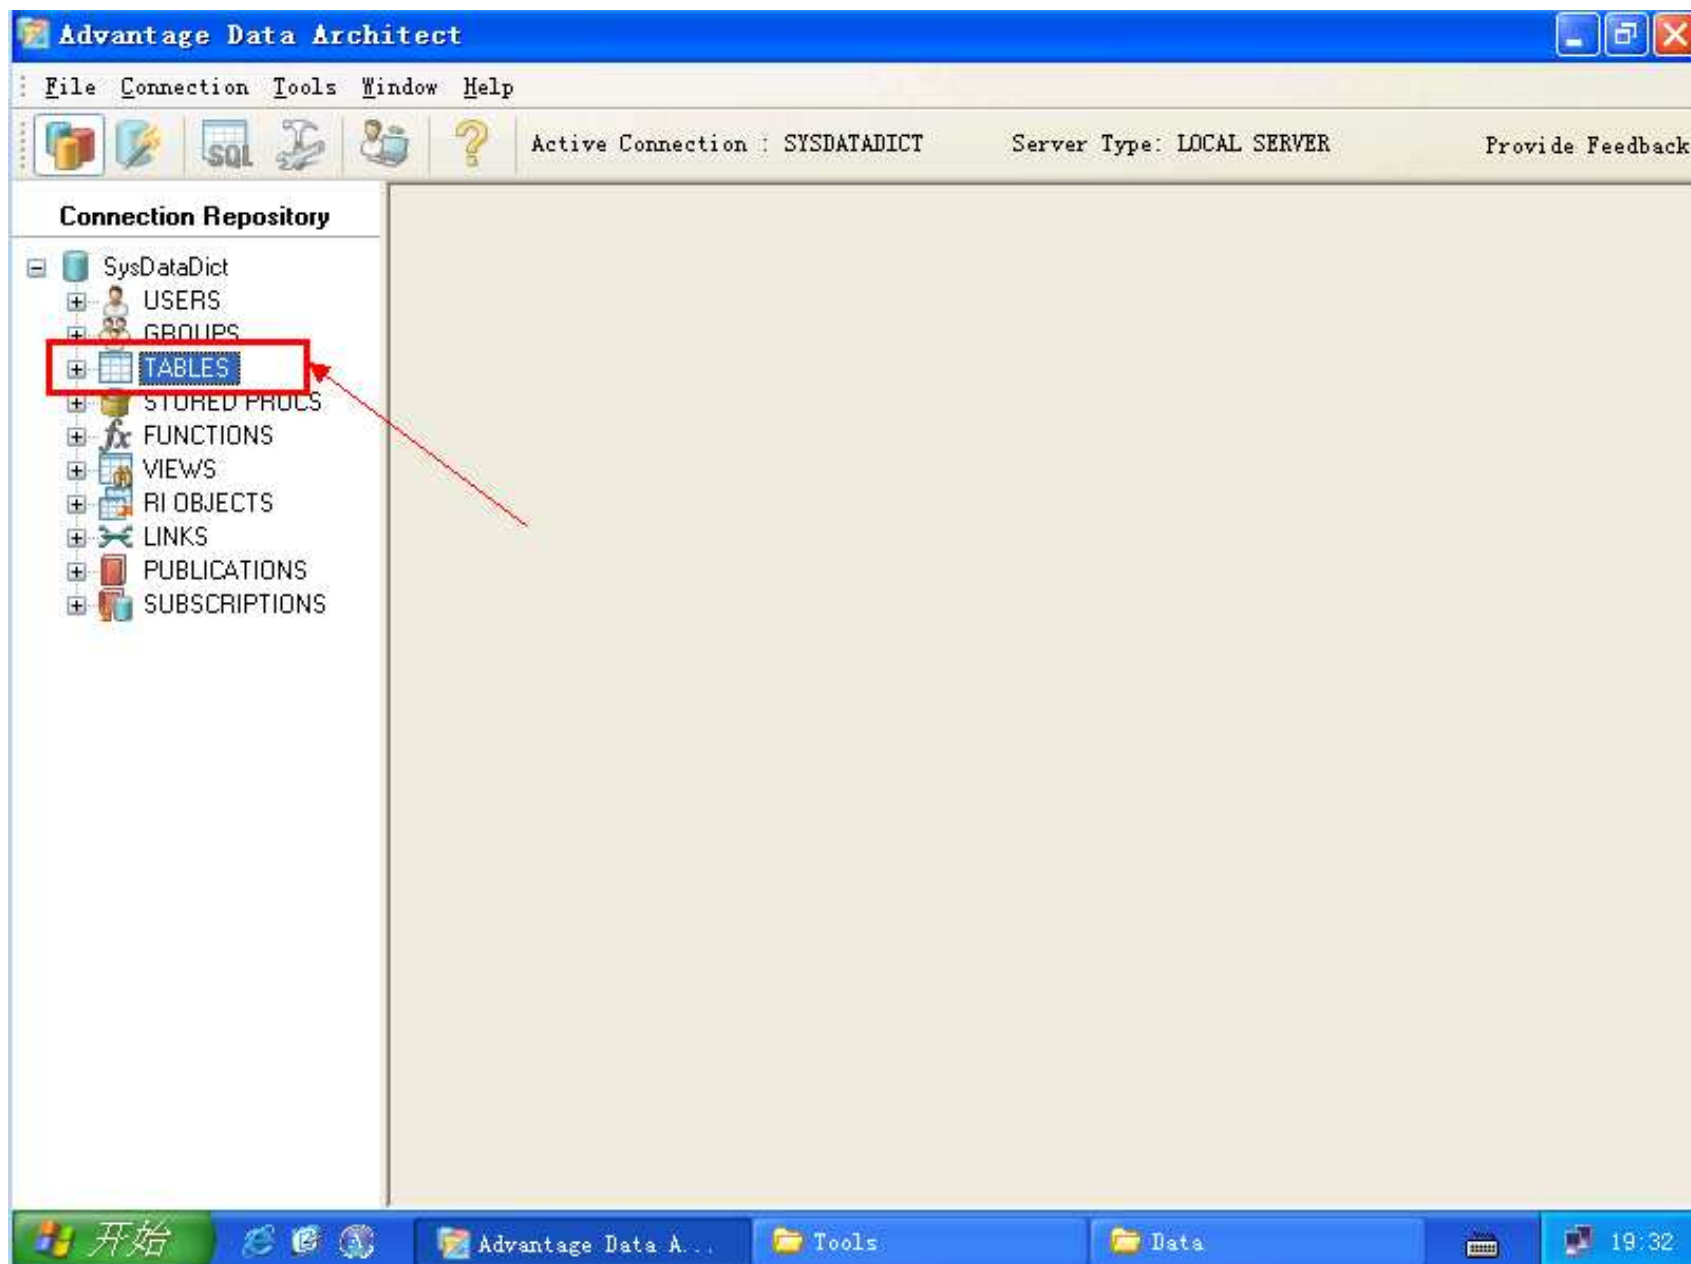

```
select top 10 * from partflm order by part_des desc
```

Below the query editor, the results are displayed in a table with the following columns: PART_NO, PART_DES, and PART_DES1. The results are as follows:

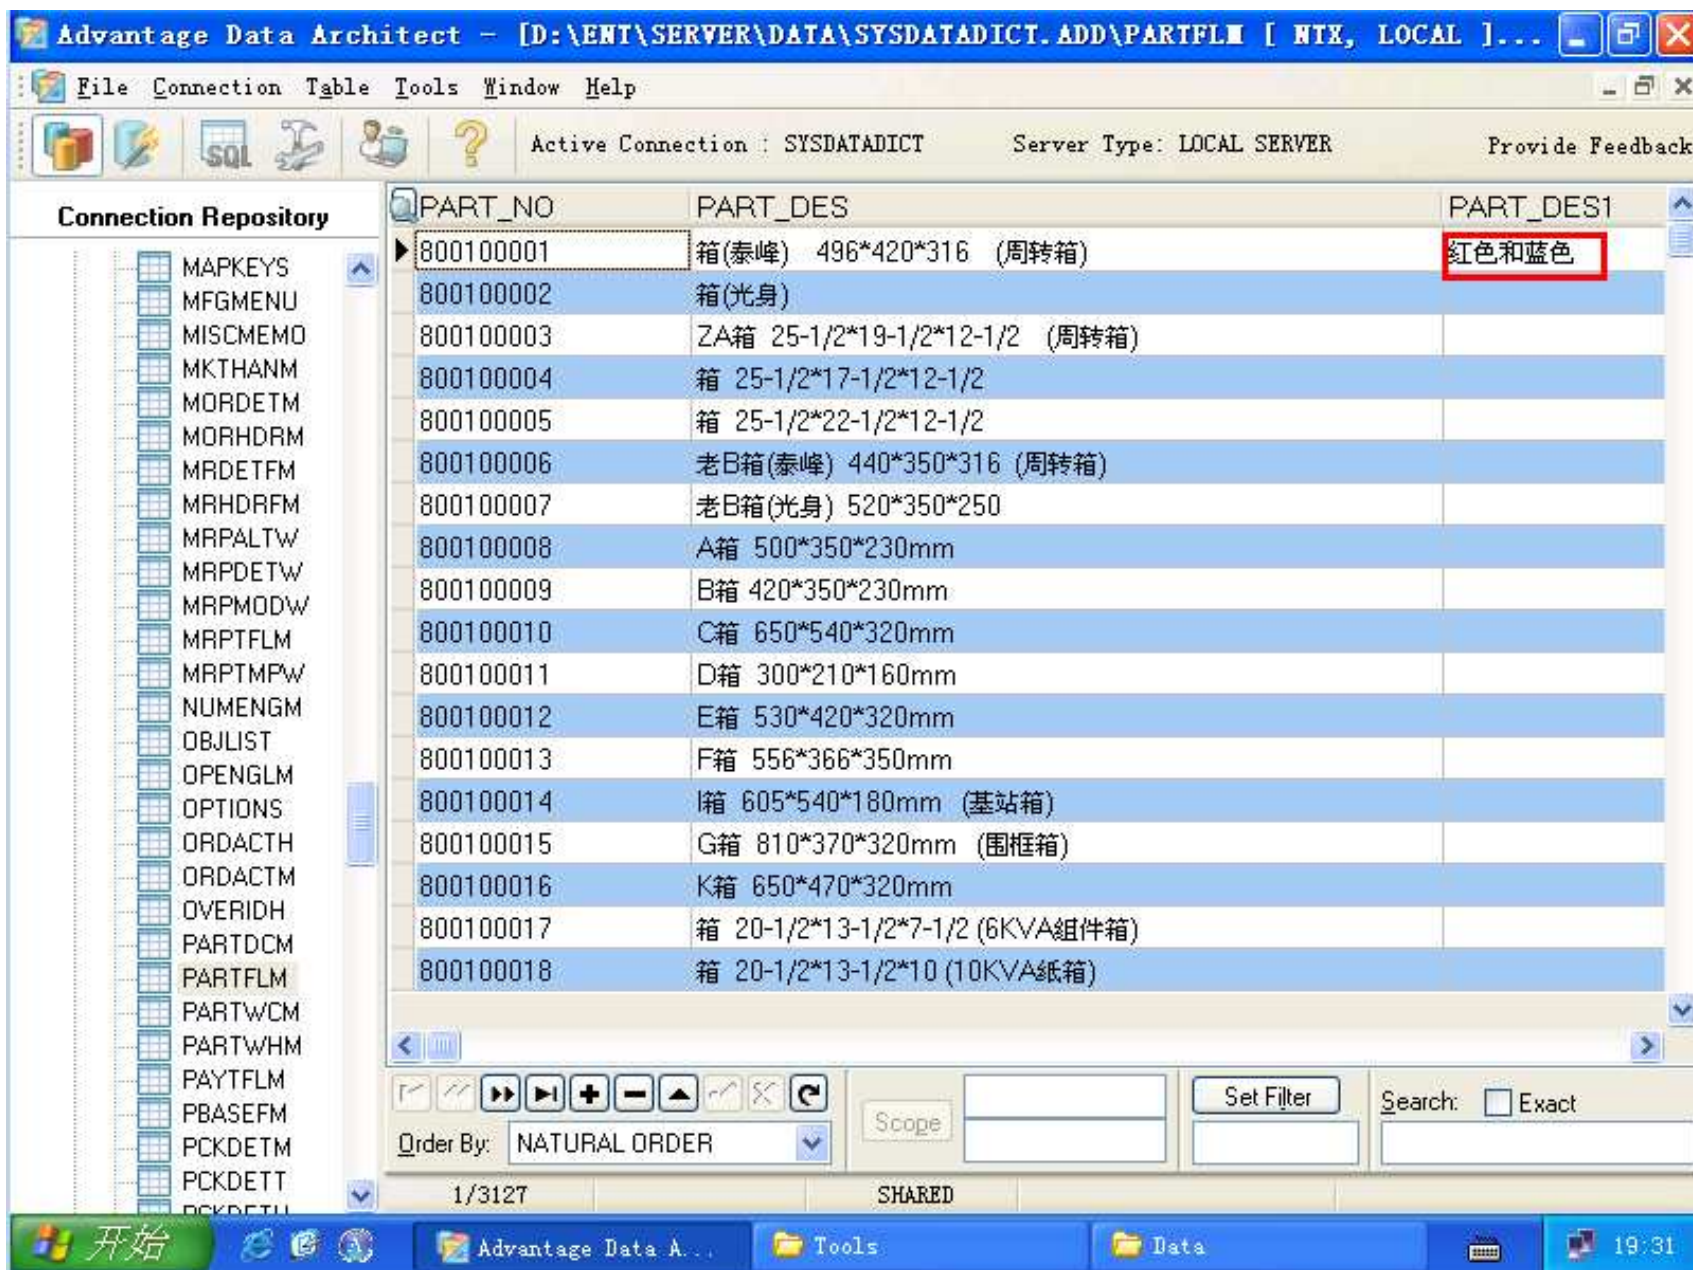

PART_NO	PART_DES	PART_DES1
010180800115	镜头圈	
MJ5010U12S005053	風扇 50x50x10 12V 超高轉"HJB" 5200±8% RPM	
D5010U12S005053	風扇 50x50x10 12V 超高轉"HJB" 5200±8% RPM	
M03200460050	鍍鎳鐵殼 20.0×4.6×0.5 mm	
M3400630800	錫絲 0.8mm 63% SN	
010082100132	座套	
010080810892	左裝飾蓋	
010080810301	左圍框面板	
010580810301	左圍框面板	
010080920112	左繞線盤	

The interface also shows a Connection Repository on the left with a tree view containing SysDataDict, USERS, GROUPS, TABLES, STORED PROCS, FUNCTIONS, VIEWS, RI OBJECTS, LINKS, PUBLICATIONS, and SUBSCRIPTIONS. The status bar at the bottom indicates the execution time as 0 Hrs 0 Min 0 Sec 31 ms and the current line as Line: 1 C.

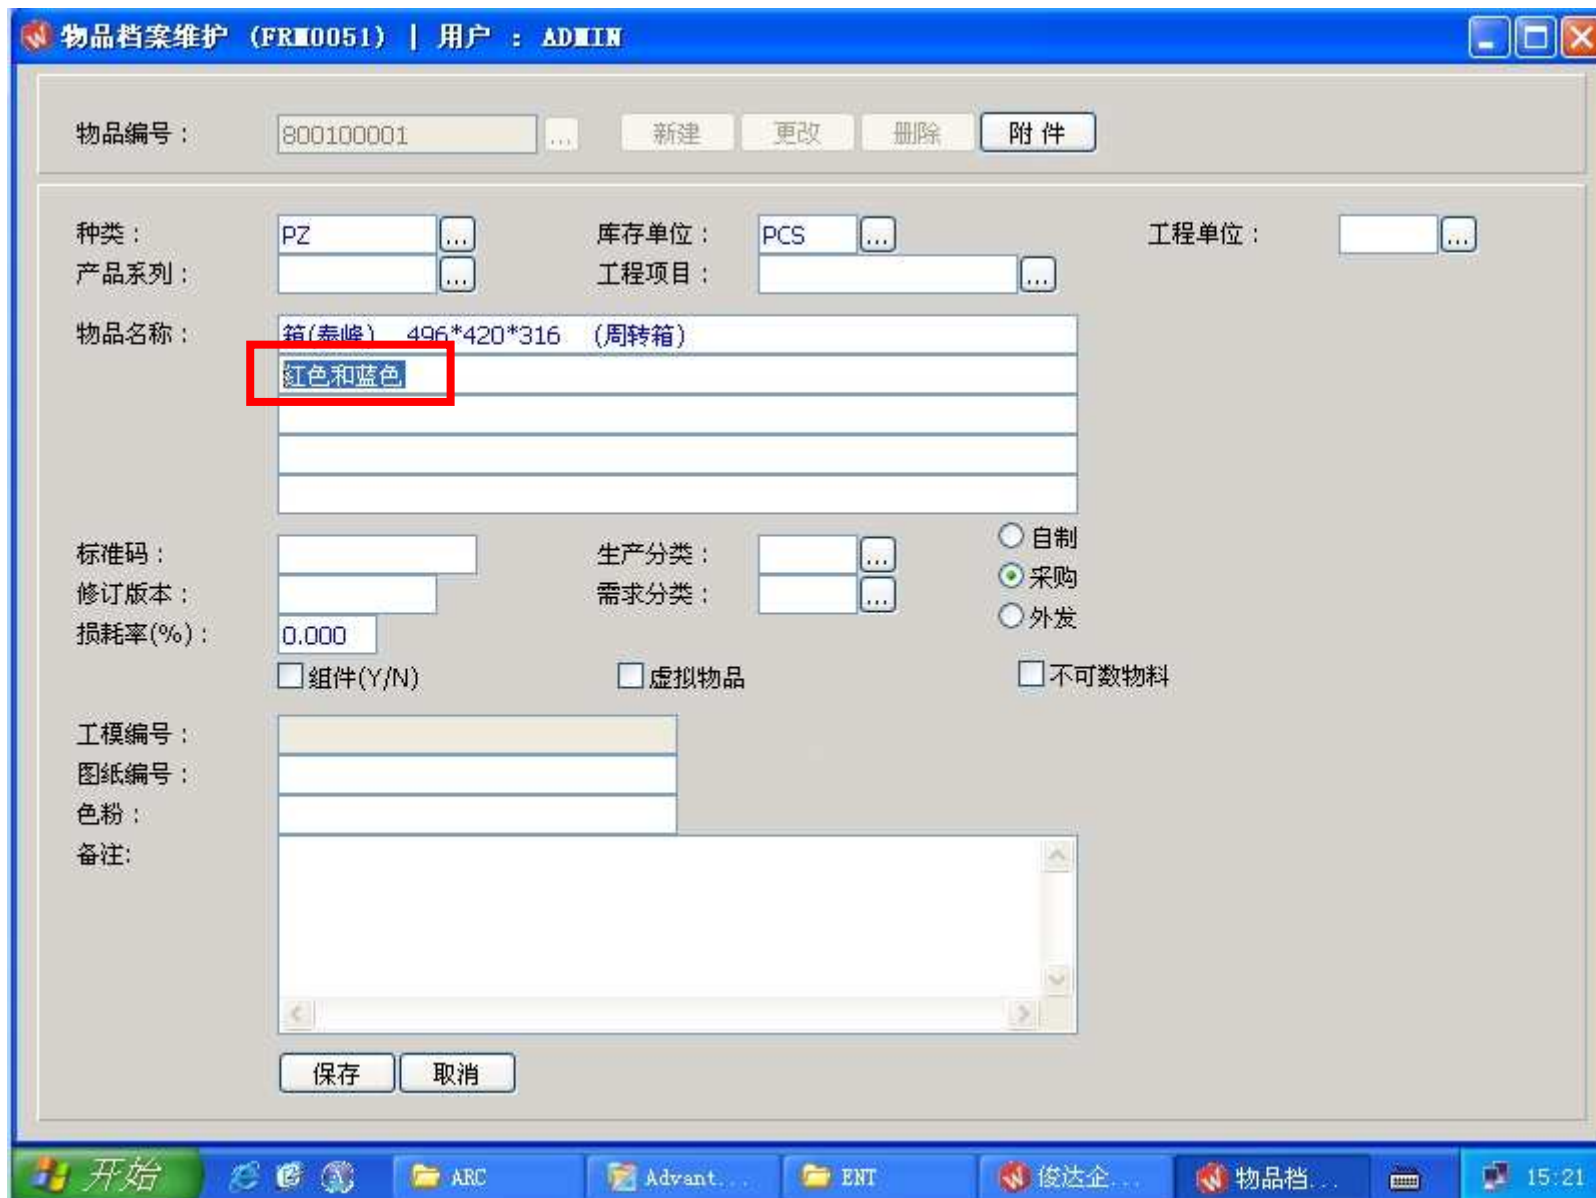

11) 选择“SYSDATADICT” -> “Tables”用户可以查询和维护 ERP 系统的所有数据表;

12) 双击列表中的“PARTFLM”，用户可浏览物品档案的内容：

13) 如果在 ARC 中修改了某栏位的内容，用户在系统刷新后可看到内容的变化：

14) SYBASE-ARC 使用的注意:

- ARC 可以管理 WGT 系统的数据库, 修改表的结构, 建立表索引等, 支持 SQL 查询语句、数所导出和维护操作;

(如果需要修改数据表结构、表索引或数据表内容, 请与系统维护人员先沟通, 以免影响系统的正常运作)
